Welcome

We warmly welcome you to the 11th edition of HPCI India – India's largest trade fair for household and personal care products. HPCI India 2022 is the one stop destination for solutions, innovation and thought leadership and serves as the platform that helps industry leaders connect with technological advancements and their core audience. With rising awareness, increase in disposable income and a growing desire for a good life and looks, the Indian Home and Personal care ingredients market offers a great potential. Forecasts for the industry are extremely good.

The 11th edition of HPCI India will be the industry's most important platform for the Indian market, with participation from leading brands both from the exhibitor and visitor side. The event keeps a clear focus on the consumers and their requirements and covers all aspects of the formulation and manufacture of household and personal care products as well as aromatic ingredients and fragrances. HPCI India goes far beyond an exhibition: an extensive two-day conference programme, workshops with eminent speakers led by the Indian Society of Cosmetic Chemists (ISCC) and technical seminars presented by exhibiting companies make HPCI a unique event. The very special Innovation Zone and coveted Innovation Awards complete the trade fair's sophisticated and educative supporting programme.

Welcome

Volatile but Exciting times ahead for the Personal and Home Care Segment in India ...

The COVID phase turned everyone's world on its head over the last couple of years. The HPC Industry was no different, and saw extreme swings in its fortunes. Depending on which side of the product spectrum one resides, the Industry either saw a windfall (Sanitisers, Cleaning Products, Personal Wellness) or a complete depression (Spa and Salon products, Colour Cosmetics). There were also the in-betweens average with Hair Care and Bath products. Our Ingredients industry consequently saw a mixed bag as well. The volatile situation was further accentuated by the disruptions in raw material supply and shipping/logistics, which seems to be the new normal going ahead. Companies across the supply chain will have to learn how to deal with these and work around it for their continued survival and success.

That said, the Personal Care, Home Care and Cosmetics segments in India has so far only seen the tip of the iceberg in terms of its true potential, and is a fast-growing segment, which will continue to be fuelled by a highly aspirational and young middle-class sector of over 300 million people.

Specialty Chemicals and Ingredients form the functional core of products in these segments. However, the growth in this industry must be tempered with the right choice of ingredients, formulations and processes to ensure that the final products that reach the end-consumer are of a high quality and more importantly compliant with regulations and HSE considerations. This is where HPCI, as an event, strives to connect the entire value chain, addressing exactly the above-mentioned aspects, and powering the sustainable growth of this Industry. The Show, held on an annual basis, since the last 10 years or so, brings together the leading suppliers of ingredients, and also the leading buyers and formulators from the industry across the country. This buyer-seller interaction which forms the core of the Exhibition, is suitably augmented by technical and business conference tracks.

We remain committed to working with the Industry as a reliable, committed and ethical partner, working hard and working smart towards our core objective of uplifting the Industry, and warmly invite all industry stakeholders to be a part of this vision

Welcome

ISCC Conference at HPCI 2022: Trends 3.0: Game Changer in the Cosmetic Industry

The past two years have been difficult ones for the Cosmetic Industry. Our time in lockdown has forced us to change the way we look at and buy Cosmetic and Personal Care products. This year's ISCC conference theme - Trends 3.0: Game Changer in the Cosmetic Industry, focusses on how we can deal with Constant Change in an ever evolving world, and, New Technology that is central to the way we have adapted to the new way of life and work.

The ISCC Conference at HPCI 2022 gives us insights on a range of trending topics. From how Cosmetics are being formulated and how brands are making use of Artificial Intelligence to get data on what, why and how consumers are buying, to how digital marketing has become the norm, and how E-commerce has grown and will continue to grow in the coming years.

During the pandemic, consumers had the time to evaluate their needs and became mindful of conscious consumption and purpose driven products. It became very necessary for Brands to showcase technology advancements which catered to these needs of the consumer, and there has been a lot of innovative work done during this period.

The ISCC conference will have presentations showcasing some of these innovative products, as well as Sustainability and Packaging trends. As Artificial Intelligence has become a key factor in consumer understanding and brand decision making it is necessary for us to give this subject its due in the conference. Also there is a heightened awareness amongst consumers about the safety aspects of cosmetic products. This concern will be addressed in the ISCC workshop on Safety Evaluation of Cosmetics on Day 2 of the conference.
